SUMMARY

Cybersecurity and GRC professional with 9+ years of IT infrastructure, networking, troubleshooting, and technology support experience. Hands-on experience performing security control assessments, risk analysis, audit documentation, vulnerability reviews, security monitoring, and incident investigations. Applied NIST CSF 2.0, ISO 27001:2022, and CIS Controls v8 across portfolio-based security assessments involving identity, logging, vulnerability management, data protection, and governance.

EXPERIENCE

Senior IT Network Technician

2020–2023

Interconnexion Point Limited

- Supported enterprise networking, IT infrastructure, system administration, connectivity, and end-user operations.
- Troubleshoot network, hardware, software, account-access, and system issues to maintain business continuity.
- Maintained technical documentation and supported structured operational and technology-governance processes.
- Applied networking and infrastructure knowledge to security analysis, control evaluation, troubleshooting, and incident investigation.

PROJECTS

Security Audit & Control Assessment Series — Meridian Consulting Group

- Completed five consulting-style security assessments covering identity and access management, logging and monitoring, vulnerability management, data protection, and security governance.
- Identified control gaps including orphaned accounts, incomplete MFA coverage, delayed patching, end-of-life systems, insufficient logging, and missing security policies.
- Mapped findings and recommendations to NIST CSF 2.0, ISO 27001:2022, and CIS Controls v8.
- Developed risk findings, maturity assessments, and prioritized remediation roadmaps for identified security weaknesses.

Security Operations Investigations

- Investigated suspicious authentication activity, phishing, Windows security events, DNS activity, brute-force behavior, and network traffic.
- Used Splunk and security logs to identify patterns, correlate events, analyze indicators, and support incident-investigation workflows.

TECHNICAL SKILLS

GRC & Audit: Risk Assessment

GRC & Audit: Control Assessment

GRC & Audit: Gap Analysis

GRC & Audit: Audit Documentation

GRC & Audit: Remediation Planning

GRC & Audit: Security Policies

GRC & Audit: Control Maturity

Frameworks: NIST CSF 2.0

Frameworks: ISO 27001:2022
Frameworks: CIS Controls v8
Security: Incident Investigation
Security: Vulnerability Management
Security: IAM
Security: Log Analysis
Security: Network Security
Security: Phishing Analysis
Tools: Splunk
Tools: Qualys VMDR
Tools: Wazuh
Tools: Wireshark
Tools: Windows Event Viewer
Tools: Microsoft 365
Tools: Cisco
Tools: Linux
Tools: Python
Tools: SQL

CERTIFICATIONS

CompTIA Security+
Splunk Core Certified User
Google Cybersecurity Professional Certificate
Qualys VMDR & Vulnerability Management
Qualys CyberSecurity Asset Management
Per Scholas Cybersecurity Program
Cisco Network Defender Training

PORTFOLIO

richvince.github.io/Richard-Vincent GRC audits • Risk & control assessments • Security investigations • Vulnerability analysis • Splunk log analysis
